Subject: Microsoft attack by AOL

As an investor in AOL I can only say that I am utterly disgusted with AOL/Netscape concerning this obscene lawsuit.
If the AOL people have nothing better to do with their management time, then I see not much of a future for them.
As you must know the Microsoft Explorer software is so much superior to the abortions dreamed up by Netscape that one would not touch the Netscape product with a ten foot pole.

Procomp should be equally ashamed.
